YES, PRESIDENT. SINCE LAST YEAR, HE'S FREQUENTLY COME UP AS A PROBLEM IN OUR MEETINGS!
WE'VE LOST COUNT AS TO HOW MANY TIMES HE'S CAUSED TROUBLE SINCE COMING TO THIS SCHOOL!

THERE HAVE BEEN SEVERAL COMPLAINTS DIRECTED AT THE STUDENT COUNCIL ABOUT THIS.

# Yoshikawa's Room

## A Place Where Yoshikawa Can Express Herself Freely

To all my readers, both old and new,

## Hello, my name is Yoshikawa!!

Thanks for picking up the first volume!
So, did you like the story?

It's pretty tough depicting the characters (for example, when the girl Urara's body is inhabited by the boy Yamada, she becomes **bowlegged**), and although I try to pay attention to the slight movements of the characters when I draw them, it's still really difficult!! But "switching bodies" is a fresh, new idea, so it's also true that I had a lot of fun illustrating the story. However, I feel like I still have a lot to learn in order to convey these characters better.

While preparing to drawing this story, all I did was have fun, doing thing like taking the staff on a trip overseas and playing games, so maybe I should've practiced drawing a bit more… But I have no regrets!! From now on, I'm going to do my very best!!

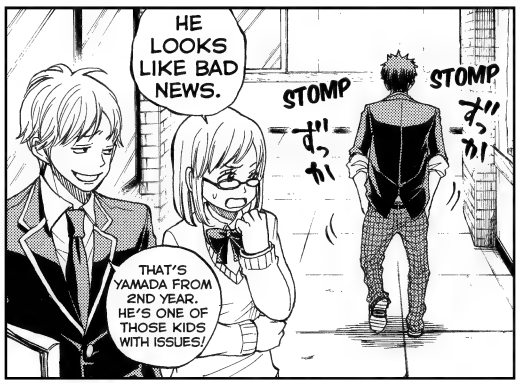

And so, this story is still just beginning, but things are going to get very interesting, so get excited for what's to come! Well, that's all from me this time!

# Translation Notes

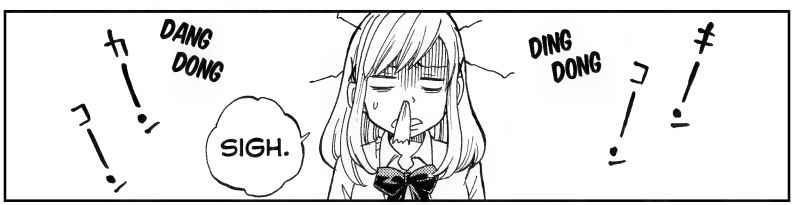

## Grades/years in a Japanese High School, page 8

Japan's education system divides grades or years differently than the U.S. system. Both systems have 12 years of education before college, but in Japan, elementary school is for six years, junior high is for three years, and high school is for another three years. The key difference here is that Japanese high schools are not four years long. If the titular character, Yamada, were in his second year of high school in America, he would be in the 10th grade, making him 15-16 years old, but in Japan he is one year ahead, making him 16-17 years old. It should also be noted that his next year will be his last year in high school, which explains why his classmates are concerned about college in this story.

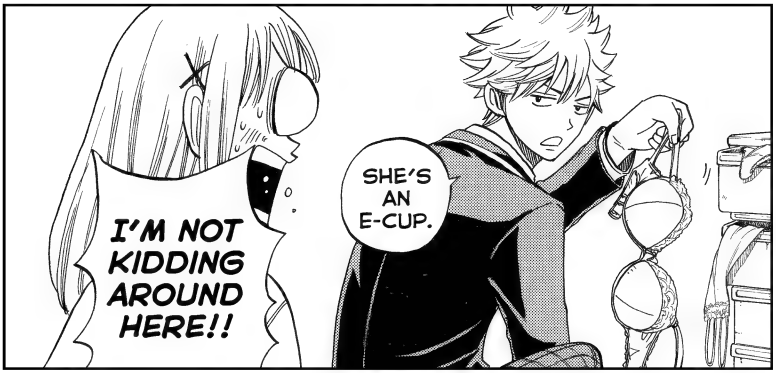

## Westminster Quarters, page 25

The bell chime that is being expressed in this scene is a very specific melody that people who have lived in Japan or Taiwan are likely to be familiar with. This melody is commonly referred to as Westminster Quarters, in reference to the place where it is famously played, the clock tower at the Palace of Westminister in London, England. In Japan and Taiwan, this melody is used to signal the beginning or end of a school period. In this scene, the reader can understand that Yamada-kun (in Shiraishi's body) has to get to class.

## Japanese bra sizes, page 127

In Japan, bra sizing is fairly different, and even the way that bras are made is not the same as it is in the United States. This is to accommodate the body shapes and features of the Japanese population, which are understandably different from many Western countries. One loose rule for figuring out the equivalent cup in the American sizing standard, is to just go down one letter, so in this case, Shiraishi's E-cup might be a D-cup in the United States.

## School cleaning duties, page 189

Unlike in the United States, it is common for Japanese students to clean their own school. For the most part, Japanese schools do not employ janitors, and it is customary for students to form groups to clean classrooms, hallways, and courtyards during the designated cleaning time. Another interesting difference in regard to cleaning in Japan, is that instead of a regular mop, it is often the case that a cleaning cloth called a *zoukin* is used to dust and mop floors. If you watch anime or read manga that involves a Japanese shrine or temple, you may have seen this cloth being used to clean the wooden floors in a scene or two.
